SAXPY: GPU memory vs PCIe bound
GDDR7 peak 1.79 TB/s
PCIe 5.0 x16 nominal 64 GB/s
effective GB/s (12N bytes / time)
N (floats per vector)
kernel only (device memory)
end-to-end, pinned, 4 streams x 16 chunks
end-to-end, pinned (cudaMallocHost)
end-to-end, pageable (std::vector)
